

BOILERSOURCE IS YOUR SOURCE FOR COMBINED HEAT AND POWER (CHP) 5-200 kW RANGE

POWERING EFFICIENCY, REDUCING COSTS

Boilersource is proud to be **THE** source for cutting-edge Combined Heat and Power (CHP) systems in the 5-200 kW range. We are the authorized representatives for industry-leading brands, including EC Power, Axiom, and Enginuity Power Systems, offering solutions that enhance energy efficiency and deliver tangible cost savings.

Why Choose a CHP System?

A CHP system is a smart investment for any facility looking to optimize its energy use. These systems simultaneously generate electricity and useful heat from a single fuel source, such as natural gas, biogas, or propane. The result? A significant increase in energy efficiency, as waste heat that would typically be lost in conventional power generation is instead harnessed for heating purposes.

What our CHP Solutions can do for you:

Produce Heat and Electrical Power

Reliable power for your equipment, lighting, and other electrical needs. Use the heat for space heating, water heating, or industrial processes.

Reduce Emissions

Using clean natural gas to produce electricity will reduce your carbon footprint vs buying power from the utility.

Enhanced Resiliency

On-site power generation provides relief and protects from electrical utility outages.

Generate Savings

Reduce utility expenses starting on day one. Rebates and tax incentives are also available.

Ideal Applications for a 5-200 kW CHP System

Small to Medium-Sized Commercial Buildings

Perfect for hotels, office buildings, and shopping centers with consistent demand for both electricity and heat.

Healthcare Facilities

Ensure continuous power and heat supply for critical operations in hospitals and clinics while improving energy efficiency.

Small Industrial Plants

Meet the dual needs of electrical power and process heat in manufacturing settings like food processing or chemical plants.

Multi-Unit Residential Buildings

Provide reliable power and hot water to tenants in apartment complexes or condominiums.

Schools and Universities

Support year-round occupancy with dual energy outputs, ensuring powered classrooms and heated spaces.

Partner with Boilersource

When you choose Boilersource, you're not just investing in a product – you're partnering with a team committed to delivering innovative energy solutions that meet your specific needs. Whether you're looking to improve operational efficiency, reduce energy costs, or contribute to a more sustainable future, our CHP systems are the perfect choice.

Contact us today to learn more about how our CHP systems can benefit your facility.
